

# Halogen Free Statement

Currently there is no legal mandate against halogen content contained within products. However, Venkel Ltd. voluntarily chooses to address this issue as it pertains to the definition of Halogen-Free as set forth by the International Electrochemical Commission's (IEC). In this definition, the IEC recognizes chlorine and bromine contained within a product. As per the definition, products are considered Halogen-Free if they contain these chemicals below the thresholds that are stated below.

- 900 ppm maximum chlorine
- 900 ppm maximum bromine
- 1500 ppm maximum total halogens

While there are other chemicals in the periodic table that are classified as halogens, the IEC is most concerned with the above mentioned chemicals. All Venkel Ltd. products sold are Halogen-Free as defined by the IEC.
